

Get *alerts*, Stay on top of market movements

In January 2016 alone, the Straits Times Index made a 12% move down from 2,889 to 2,529. In the next three months, it moved up a total of 17% to a high of 2,964. With so much volatility in the market, it is important to monitor market movements to take advantage of the trading opportunities. However, most retail investors are working full time, which leaves them with little or no time to monitor the stock market.

Stay up-to-date with the latest happenings, using the Stock Alerts and SGX market news alert features on our KE Trade online trading platform. You will receive push notifications on your mobile, or get emails when stocks of interest cross certain price thresholds, annual reports are released, annual general meetings are coming up, etc.

You can configure your stock alerts in a few simple steps:

1. Click on "Trade" on the main menu bar
2. Click on "Stock Alerts" on the grey menu bar
3. Enter the stock code
4. Configure the alert type based on your preference
5. Specify your alert value
6. Click on the "Update" button

Taking the first stock alert in figure 1 as example,

investor will receive an alert via SMS and/or email whenever the share price of CapitaMall Trust goes below \$1.80.

Besides, you can also set up alerts based on company news such as corporate actions (dividends, rights issues or bonus shares), as well as company announcements, as seen in Figure 2.
